- **100% 30-Day Money Back Guarantee***

Think Green!

- Americans buy over 30 billion single-serve water bottles each year.
- It takes over 40 million gallons of oil to produce these bottles.
- Only 14% of single-serve bottles are recycled.
- It takes an estimated 1,000 years for a plastic water bottle to decompose.

Culligan Aqua-Clear CC Coolers Use A Multi-stage Process to Treat Your Water.

Starts with water from the local water system.

GOOD filtration

Providing crystal clear, great tasting drinking water.

Sediment filtration reduces particles such as dirt and rust.

Activated carbon reduces chlorine and other elements which can cause bad tastes and odors.

BETTER filtration

Providing crystal clear, great tasting drinking water free from contaminants.

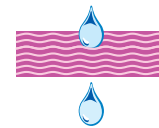

Reverse osmosis system reduces contaminants such as lead, sodium, radium and even Giardia Cysts by forcing water through an ultra-fine membrane.

A second activated carbon filter gives the double assurance your drinking water is clear and fresh.

BEST filtration

Providing the highest quality drinking water at your fingertips.

Bio-Cote® to inhibit biological growth.

Ultraviolet sanitation controls bacteria and reduces biological growth.

End result...

The clean, crystal clear, great tasting water you deserve.

CULLIGAN AQUA-CLEAR CC SERIES

The Best in Bottle-less Technology From Culligan

Point of Use Quality and Convenience

Hard working people need proper hydration. Some common office beverages such as soda and coffee can actually dehydrate the body. Water is the best choice for staying hydrated because it is the drink that your body needs the most.

Culligan bottle-less cooler systems offer the latest advantages in water treatment technology to treat your existing water supply. Whether it's for drinking or making great tasting coffee and other beverages, these systems will provide your office or home with an endless supply of quality hot and cold drinking water.
